Bonnie Ponwith, Ph.D., Director
National Marine Fisheries Service
Southeast Fisheries Science Center
75 Virginia Beach Dr.
Miami, Florida 33149

Dr. Ponwith;

At its June 2016 meeting in Clearwater Beach, Florida, the Gulf of Mexico Fishery Management Council (Council) considered its stock assessment priorities for 2018 – 2021. The Council's goal was to establish its intent to have more assessments completed each year. The Council recognizes current resource limitations which may prevent this goal from being realized in the short term; however, the Council expects that by making its intentions known to both the Southeast Fisheries Science Center and the Southeast Data, Assessment, and Review (SEDAR) program, that some progress can be made with respect to increasing the number of assessments completed each year for Gulf species. The Council has considered the stock assessment prioritization tool (tool) proffered by the National Marine Fisheries Service (NMFS) in creating the attached list of species assessments; however, other factors including pending management actions and rebuilding plans may see the Council deviate from the NMFS tool. Representatives from the Council would like to discuss this list at the next SEDAR Steering Committee meeting in September 2016 in Charleston, South Carolina. Please contact the Council if you have any questions about this request.

Sincerely,

Doug Gregory, Executive Director
Gulf of Mexico Fishery Management Council
