---

Recreational catch estimates for Snowy Grouper are compiled from the Marine Recreational Information Program (MRIP). Details on MRIP can be found in SEDAR68-DW-13.

---

Parameters for data prepared for SEDAR 36-Update recreational catch data:

Species: Snowy Grouper

Year Range: 1981 - 2018

Geographic Range: South Atlantic states from eastern Florida to North Carolina, including the Florida Keys.

Fishing Modes: Charter, Private

Survey Methodology: Fully calibrated estimates that take into account the change in the Fishing Effort Survey, the redesigned Access Point Angler Intercept Survey, and the For Hire Survey

---

---

## Tables

**Table 1.** Annual landings (AB1) and discards (B2) of Snowy Grouper in numbers of fish by state and year (MRIP).

**Table 2.** Annual landings (AB1) and discards (B2) of Snowy Grouper in numbers of fish by mode and year (MRIP).

**Table 3.** Snowy Grouper landings in numbers of fish (AB1) with associated coefficients of variation (CV; Dettloff et al. 2020) by mode and year (MRIP). Sample size (SS) is provided as the total number of angler trips intercepted by MRIP samplers within a specified strata and, in parentheses, the number of angler trips that intercepted Snowy Grouper. Intercepted fish include those landed (AB1) and discarded (B2).

**Table 4.** Snowy Grouper discards in numbers of fish (B2) with associated coefficients of variation (CV; Dettloff et al. 2020) by mode and year (MRIP). Sample size (SS) is provided as the total number of angler trips intercepted by MRIP samplers within a specified strata and, in parentheses, the number of angler trips that intercepted Snowy Grouper. Intercepted fish include those landed (AB1) and discarded (B2).

**Table 5.** Estimated landings of Snowy Grouper in pounds whole weight by state and year (MRIP).

**Table 6.** Summary of length measurements (millimeters fork length) from MRIP-intercepted Snowy Grouper by state and year. Summaries include the number of fish measured by MRIP (Fish), the number of angler trips from which those fish were measured (Trp), and the minimum (Min), geometric mean (Avg), and maximum (Max) size of fish lengths.

**Table 7.** Summary of weight measurements (pounds whole weight) from MRIP-intercepted Snowy Grouper by state and year. Summaries include the number of fish weighed by MRIP (Fish), the number of angler trips from which those fish were weighed (Trp), and the minimum (Min), geometric mean (Avg), and maximum (Max) size of fish weights.

**Table 8.** Recreational Fishing Effort (in angler trips) for South Atlantic anglers by mode and year (MRIP).

---

---

## Figures

**Figure 1.** Comparison of charterboat landings (AB1) and discard (B2) estimates (with standard error intervals shown) for Snowy Grouper from the Coastal Household Telephone Survey (CHTS) and For-Hire Survey (FHS) from the South Atlantic between 1981 to 2003.

**Figure 2.** MRIP Base (BASE), APAIS Calibrated (ACAL), and Fully Calibrated APAIS and FES (FCAL) catch estimates for Snowy Grouper in the South Atlantic. Landings (AB1) and

discard (B2) estimates are in thousands of fish. Estimates in this figure do not include the Florida Keys as that domain is not available from the MRIP online comparison tool (NMFS). Uncertainty estimates of total catch from this tool cannot be stratified by mode and so this figure includes estimates from all MRIP modes, including headboat and shore anglers that are not considered in this assessment.

**Figure 3.** Annual Snowy Grouper landings (AB1) and discards (B2), in thousands of fish, by state from 1981 to 2018 (MRIP).

**Figure 3a.** Percent of Snowy Grouper landings (AB1) and discards (B2), in numbers of fish, from each state by year (bar graph) and overall (pie chart) between 1981 and 2018 (MRIP).

**Figure 4.** Annual Snowy Grouper landings (AB1) and discards (B2), in thousands of fish, by mode from 1981 to 2018 (MRIP).

**Figure 4a.** Percent of Snowy Grouper landings (AB1) and discards (B2), in numbers of fish, from each mode by year (bar graph) and overall (pie chart) between 1981 and 2018 (MRIP).

**Figure 5.** Estimates of annual landings for Snowy Grouper in the South Atlantic, as estimated from MRIP: estimated landings in thousands of fish (top), estimated landings in thousands of pounds whole weight (middle), and average weight of landed fish (estimated lbs/estimated fish) (bottom).

**Table 6.** Summary of length measurements (millimeters fork length) from MRIP-intercepted Snowy Grouper by state and year. Summaries include the number of fish measured by MRIP (Fish), the number of angler trips from which those fish were measured (Trp), and the minimum (Min), geometric mean (Avg), and maximum (Max) size of fish lengths.

**Table 8.** *Recreational Fishing Effort (in angler trips) for South Atlantic anglers by mode and year (MRIP).*

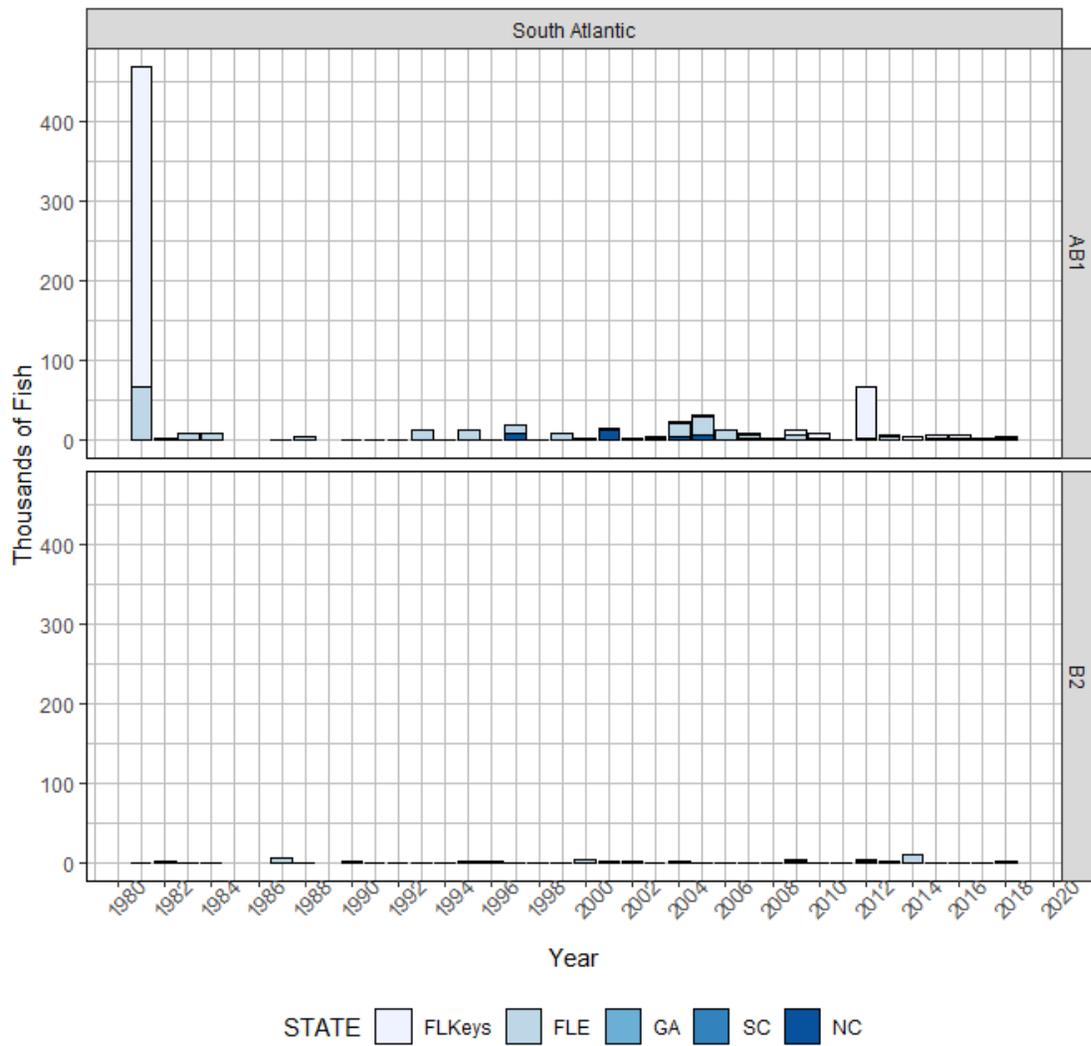

<b>Year</b>	<b>Cbt</b>	<b>Priv</b>	<b>Total</b>
1981	443,445	11,061,600	11,505,045
1982	543,344	13,686,090	14,229,434
1983	549,886	12,624,744	13,174,630
1984	631,740	15,880,341	16,512,081
1985	647,288	13,834,345	14,481,633
1986	734,582	15,120,221	15,854,803
1987	684,175	16,117,325	16,801,500
1988	574,659	13,538,214	14,112,873
1989	703,403	15,444,757	16,148,160
1990	594,310	14,473,240	15,067,550
1991	615,933	16,717,086	17,333,019
1992	574,093	16,543,089	17,117,182
1993	617,079	17,777,777	18,394,856
1994	632,200	17,436,754	18,068,954
1995	647,404	16,353,858	17,001,262
1996	632,194	17,329,456	17,961,650
1997	574,241	17,753,982	18,328,223
1998	618,206	17,065,966	17,684,172
1999	555,961	17,628,410	18,184,371
2000	514,365	20,705,579	21,219,944
2001	600,971	19,463,855	20,064,826
2002	693,754	20,401,196	21,094,950
2003	658,098	22,137,279	22,795,377
2004	663,047	21,673,683	22,336,730
2005	614,999	22,332,397	22,947,396
2006	588,260	24,764,335	25,352,595
2007	630,150	25,901,061	26,531,211
2008	545,399	24,141,904	24,687,303
2009	558,034	24,949,760	25,507,794
2010	483,966	26,837,256	27,321,222
2011	509,413	24,406,769	24,916,182
2012	537,932	22,770,757	23,308,689
2013	518,665	22,554,404	23,073,069
2014	619,611	24,333,837	24,953,448
2015	693,462	23,251,246	23,944,708
2016	716,062	22,540,147	23,256,209
2017	677,522	22,440,708	23,118,230
2018	723,594	23,909,857	24,633,451

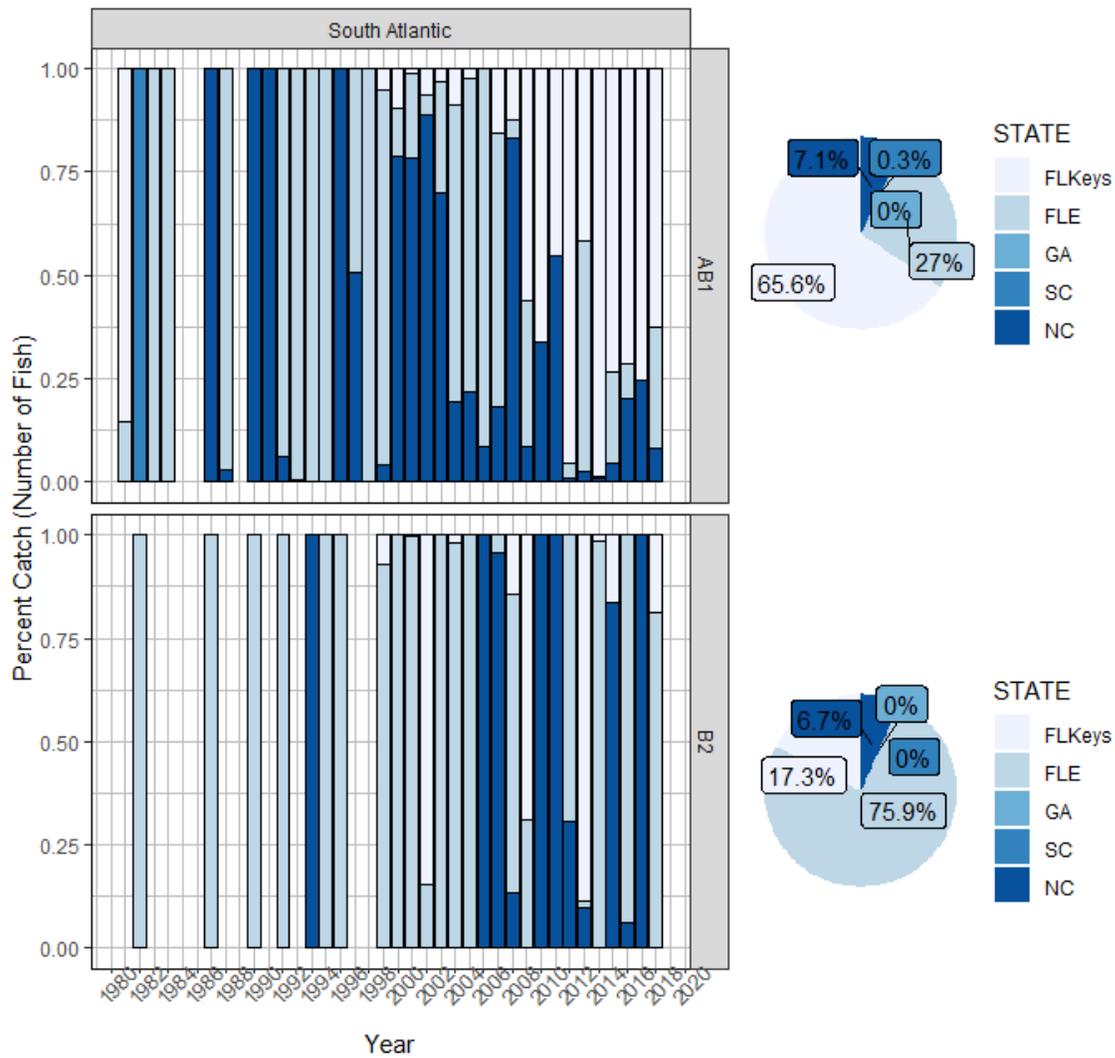

**Figure 1.** Comparison of charterboat landings (AB1) and discard (B2) estimates (with standard error intervals shown) for Snowy Grouper from the Coastal Household Telephone Survey (CHTS) and For-Hire Survey (FHS) from the South Atlantic between 1981 to 2003.

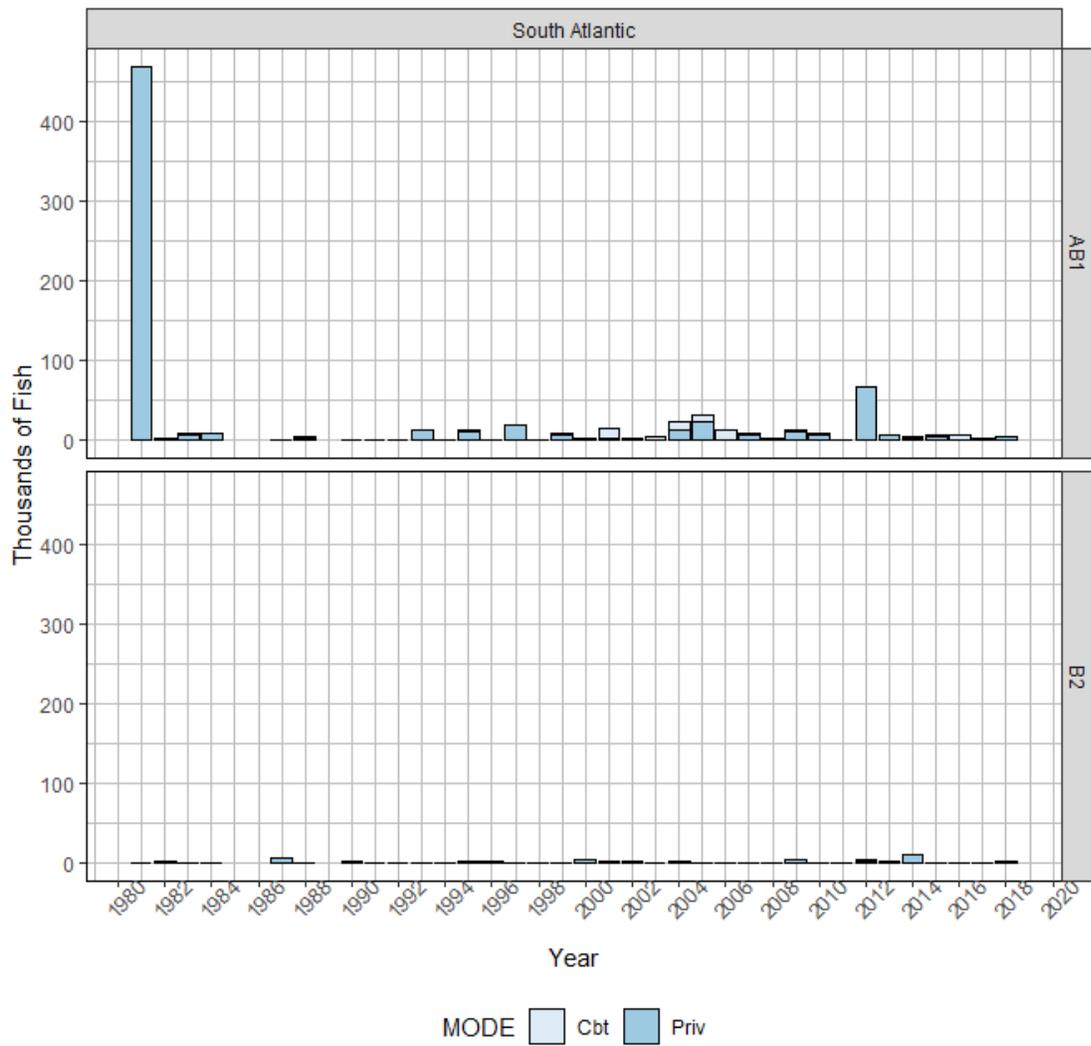

**Figure 2.** MRIP Base (BASE), APAIS Calibrated (ACAL), and Fully Calibrated APAIS and FES (FCAL) catch estimates for Snowy Grouper in the South Atlantic. Landings (AB1) and discard (B2) estimates are in thousands of fish. Estimates in this figure do not include the Florida Keys as that domain is not available from the MRIP online comparison tool (NMFS). Uncertainty estimates of total catch from this tool cannot be stratified by mode and so this figure includes estimates from all MRIP modes, including headboat and shore anglers that are not considered in this assessment.

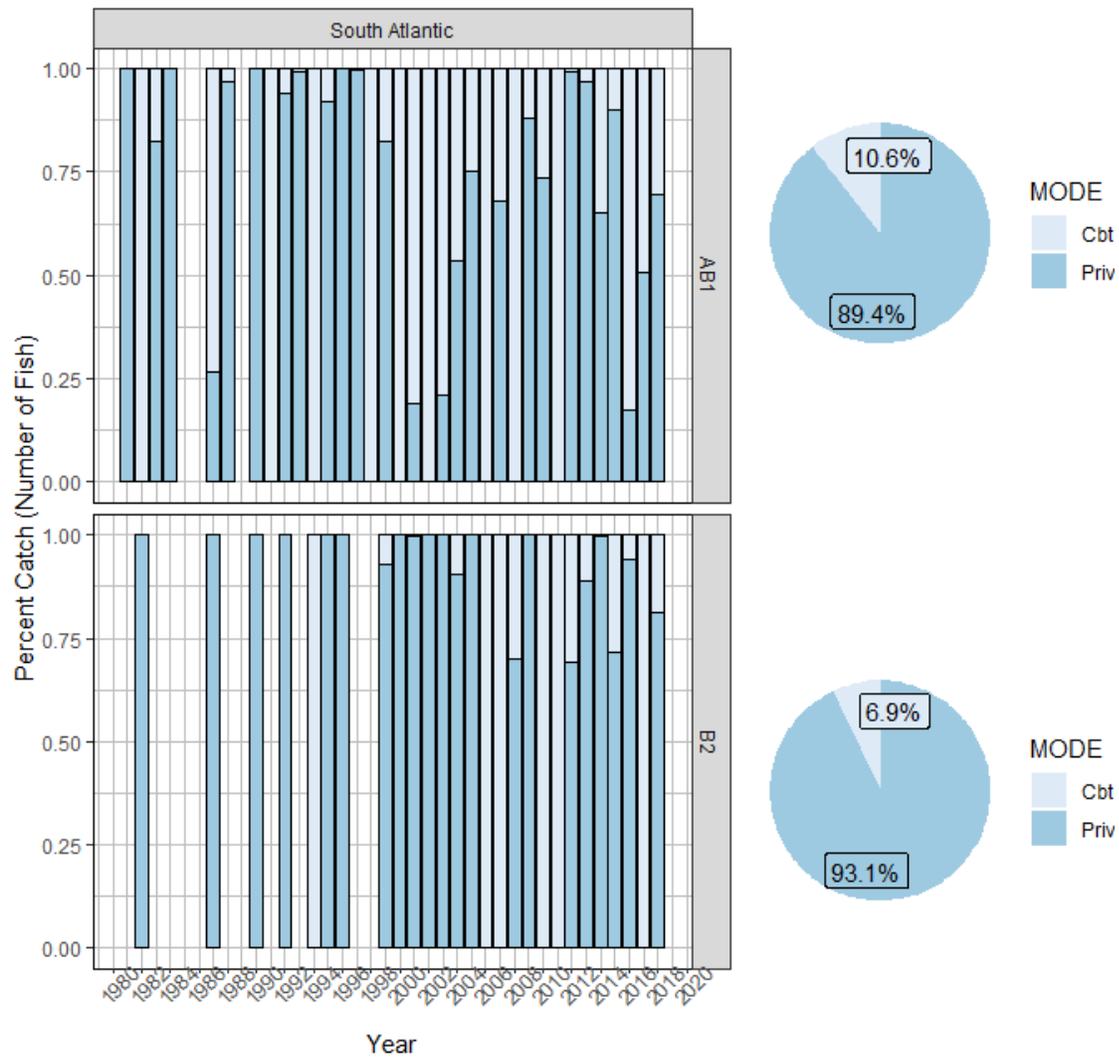

**Figure 3.** Annual Snowy Grouper landings (AB1) and discards (B2), in thousands of fish, by state from 1981 to 2018 (MRIP).

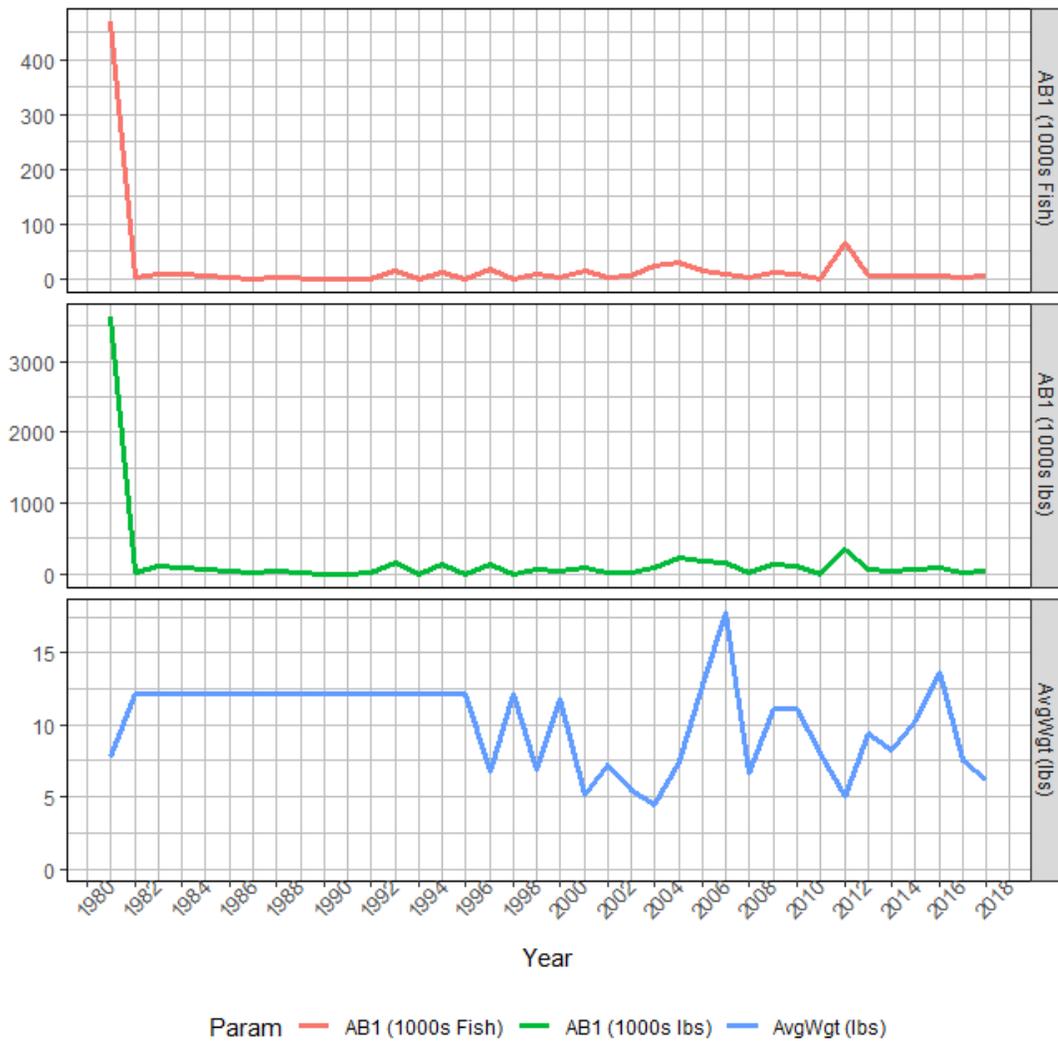

**Figure 3a.** Percent of Snowy Grouper landings (AB1) and discards (B2), in numbers of fish, from each state by year (bar graph) and overall (pie chart) between 1981 and 2018 (MRIP).

**Figure 4.** Annual Snowy Grouper landings (AB1) and discards (B2), in thousands of fish, by mode from 1981 to 2018 (MRIP).

**Figure 4a.** Percent of Snowy Grouper landings (AB1) and discards (B2), in numbers of fish, from each mode by year (bar graph) and overall (pie chart) between 1981 and 2018 (MRIP).

**Figure 5.** Estimates of annual landings for Snowy Grouper in the South Atlantic, as estimated from MRIP: estimated landings in thousands of fish (top), estimated landings in thousands of pounds whole weight (middle), and average weight of landed fish (estimated lbs/estimated fish) (bottom).
