

Modifications to the Project Planning Grid from the October 2024 Steering Committee Meeting

All:

Removed the 2023 row and adjusted all projects accordingly.

South Atlantic Assessment Modifications:

- Gray Triggerfish RT was extended to reflect the need to postpone the Review workshop.
- Red Snapper changed from RT to Benchmark; removed the follow-up OA.
- Changed Atlantic Migratory Cobia from RW Only to Benchmark, enlarged the box to reflect that change, and changed color from orange to green.
- Snowy grouper OA and red grouper benchmark color changed from blue to yellow.

Gulf of Mexico Assessment Modifications:

- Gag grouper OA changed from orange to green.
- Cobia OA changed from blue to yellow.
- Shrimp RT noted added about switching to a benchmark.

Caribbean Assessment Modifications:

- Spiny lobster was extended to reflect the approved schedule.

HMS Assessment Modifications:

- Note added to finalize species and process type for next shark assessment.

FL FWCC Assessment Modifications:

- Hogfish was moved to 2025 to reflect the change of timing due to yellowtail snapper addition.
- Yellowtail snapper OA added to the 2024 schedule.
- Black grouper assessment box changed from a benchmark through SEDAR to an MSE where SEDAR may provide a review. Timing was adjusted and color changed to purple.

Commission Assessment Modifications:

- No changes were made.

CMP Assessment Modifications:

- Gulf king mackerel was changed from orange to green.
