

## **Modifications to the Project Planning Grid from the September 2022 Steering Committee Meeting**

### Project Grid Updates

- Removed the additional block on the legend with the green dash color.
- Reworded the orange block to reflect the current SEDAR scheduling process more accurately.

### South Atlantic Assessment Modifications:

- Scamp OA was extended to reflect the updated schedule.
- Gray Triggerfish OA was changed to green to identify that it was scheduled. It was also moved later on the schedule to reflect the updated schedule.
- Gag Grouper, Atlantic Migratory Cobia and Red Porgy were changed to yellow to identify these as assessments to be finalized at the Spring 2023 meeting.
- Gag Grouper was moved later to reflect the updated schedule.
- Red Snapper RT was moved to green to identify that it was added to the SEFSC schedule.
- A question mark was added in the analyst in training column to reflect the SAFMC's questions about SEFSC staffing for the South Atlantic assessments.

### Gulf of Mexico Assessment Modifications:

- Red Snapper RT schedule was extended to reflect the updated schedule.
- Red Snapper OA was moved later to reflect the extended RT schedule.
- Red Grouper OA and Gray Triggerfish RT was changed to green to reflect that it was scheduled.
- Greater Amberjack, Cobia, and Gag Grouper were changed to yellow to reflect that these are assessments that need to be finalized at the Spring 2023 meeting.

### Caribbean Assessment Modifications:

- Queen Trigger was lengthened to reflect the updated schedule.
- Yellowtail, Spiny Lobster, Hogfish, and Queen Snapper were adjusted to reflect the updated Queen Triggerfish schedule and staffing changes.
- Spiny Lobster was changed to green to reflect that it has been added to the schedule.
- Hogfish was changed to yellow to reflect that this assessment needs to be finalized in Spring 2023.

### HMS Assessment Modifications:

- Hammerhead Sharks RT and Hammerhead Sharks OA was extended to reflect the updated schedule.
- Bull, Spinner, Tiger, and Finetooth was changed to orange to identify that it was tentatively scheduled and moved later to reflect the extended Hammerhead Sharks assessment.

### FL FWCC Assessment Modifications:

- Mutton Snapper Benchmark was extended to reflect the updated schedule.
- Hogfish was filled with a green to identify that it was scheduled.
- Hogfish and Black Grouper were moved later in the schedule to reflect the extended Mutton Snapper schedule.

## **Modifications to the Project Planning Grid from the September 2022 Steering Committee Meeting**
