

The following figures correspond to location of internal anchor tag releases and recaptures from 1981 to 2001. Recaptures only include tags that were at large at least 90 days.

Figure 1: Location of releases in the KNM Atlantic stock (n=2,735).

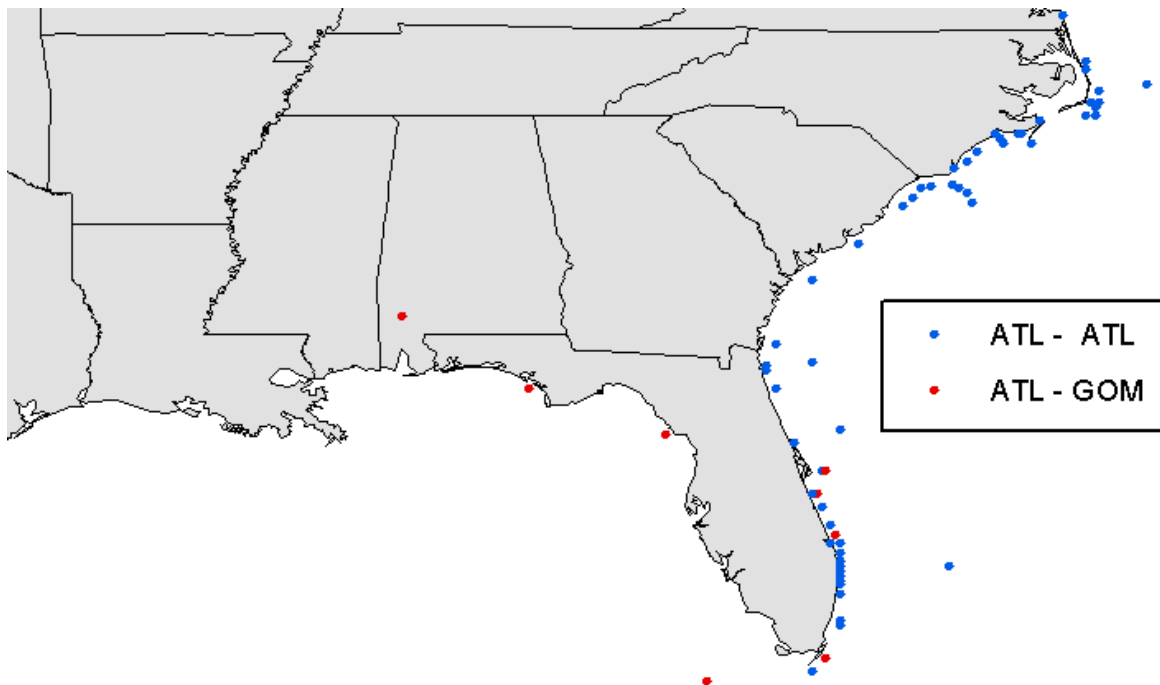

Figure 2: Location of recaptures of tags originally released in the KNM Atlantic stock. Blue circles indicate tags recovered in the same stock where they were released (Atlantic, n=139), red circles indicate tag recovered as part of the other stock (GOM, n=14).

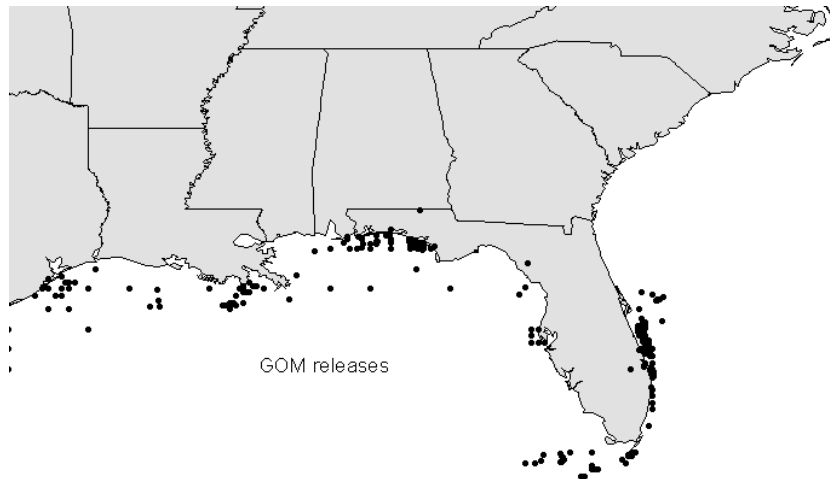

Figure 3: Location of releases in the KNM GOM stock (n=10,381).

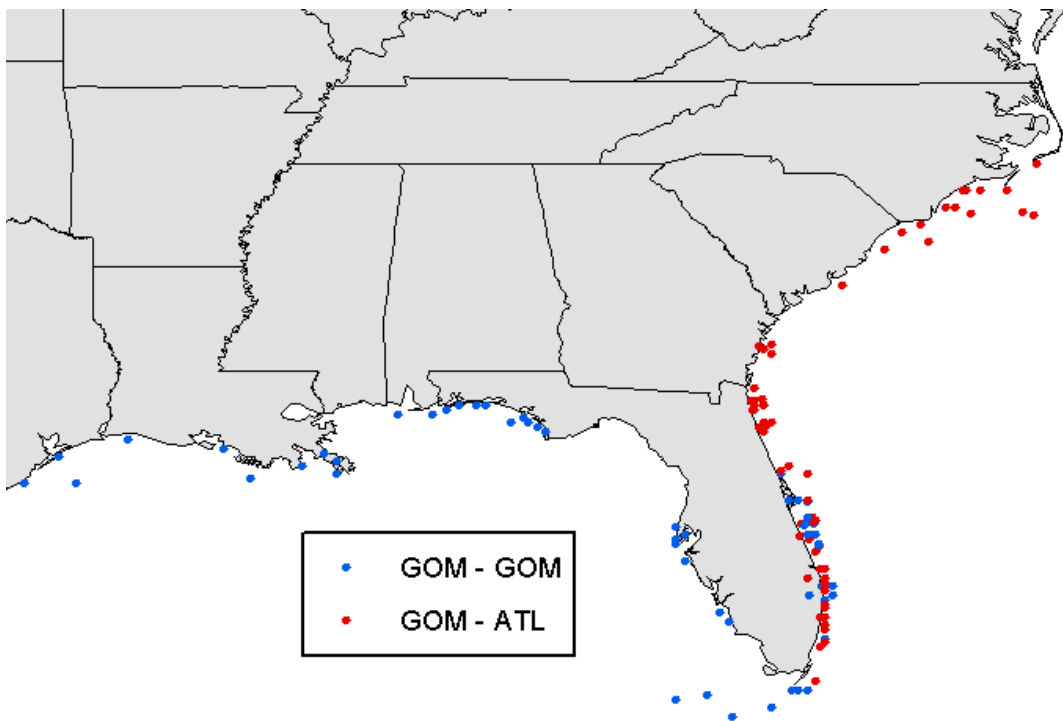

Figure 4: Location of recaptures of tags originally released in the KNM GOM stock. Blue circles indicate tags recovered in the same stock where they were released (GOM, n=254), red circles indicate tag recovered as part of the other stock (ATL, n=148).
