A Management History Database is being compiled, cataloged, and standardized by the National Oceanic and Atmospheric Administration (NOAA), National Marine Fisheries Service (NMFS), Southeast Fisheries Science Center (SEFSC) Fisheries Statistics and Sustainable Fisheries Divisions in collaboration with the Cooperative Institute for Marine and Atmospheric Studies (CIMAS) of the University of Miami.

The Management History Database effort involves:

- Identifying Federal Register documentation associated with management actions affecting federally managed species throughout the Gulf of Mexico, South Atlantic, and U.S. Caribbean regions.
- Creating standardized records specifying the Fishery Management Plan (FMP), species, jurisdiction, and fishing sector (commercial and recreational) to which each management action is applied.

Once complete, the goal of the database is to provide a comprehensive and standardized record of published management actions to increase the efficiency of fisheries stock assessments, ACL monitoring, and ecosystem approaches. However, the database is still in development and is not yet available to the public. The intention of this working paper is not to replace current management history documents but to provide complementary tables of cited regulations.

For SEDAR 84, we queried a prototype of the database for records related to Yellowtail Snapper in Puerto Rico and St. Thomas/St. John. The records associated with bag limits, size limits, prohibited gear, annual catch limits (ACLs), and closures were reviewed and are summarized here. Each of these regulation types have been documented through December 31, 2021, as this reflects the records that are currently accessible within the Management History Database. Efforts are currently in progress to document all regulations published from 2022 through the present.

Tables 1-5 outline bag limit, size limit, prohibited gear, and ACL regulations for Yellowtail Snapper from Puerto Rico and St. Thomas/St. John as they are currently documented within the Management History Database. Table 6 provides an overview of closure regulations for the recreational and commercial fisheries. The records detailing closures have been expanded to include the total duration of the closed periods annually for both recurring and distinct regulations, such as seasonal closures and one-time closures.
